

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

The Journal of Philosophy Psychology and Scientific Methods

There is no similar journal in the field of scientific philosophy. It is issued fortnightly and permits the quick publication of short contributions, prompt reviews, and timely discussions. The contents of the last five issues are as follows :

Volume VII. No. 15. July 12, 1910

The Program and First Platform of Six Realists: EDWIN B. HOLT, WALTER T. MARVIN, W. P. MONTAGUE, RALPH BARTON PERRY, WALTER B. PITKIN, EDWARD GLEASON SPAULDING.

The Conception of Philosophy in Recent Discussion. MORRIS R. COHEN.
The Problem of Time in Modern Philosophy. FREDERICK J. E. WOODBRIDGE.

Reviews and Abstracts of Literature. Journals and New Books. Notes and News.

Volume VII. No. 16. August 4, 1910

The Tenth Annual Meeting of the Western Philosophical Association. BERNARD C. EWER.

The Problem and Content of Educational Psychology. IRVING KING.
Record of an Experience while under the Influence of Ether. HARRY WALKER.

Discussion: Cause and Ground. B. BOSANQUET.

Reviews and Abstracts of Literature. Journals and New Books. Notes and News.

Volume VII. No. 17. August 18, 1910

Huxley's Epiphenomenalism : A Criticism and an Appreciation. EVANDER BRADLEY MCGILVARY.

The Central Tendency of Judgment. H. L. HOLLINGWORTH.

Reviews and Abstracts of Literature. Journals and New Books. Notes and News.

Volume VII. No. 18. September 1, 1910.

Some Implications of Anti-Intellectualism. JOHN DEWEY.

On Secular Cooling as an Illustration of the Methods of Applied Mathematics. H. S. SHELTON.

Discussion : If the Blind Lead the Blind. A Comment on "Logical Form" in Professor Perry's "Realistic Platform." HAROLD CHAPMAN BROWN.

Reviews and Abstracts of Literature. Journals and New Books. Notes and News.

Volume VII. No. 19. September 15, 1910

William James. JOHN DEWEY.

Truth and Its Object. J. E. BOODIN.

Art and Nature. H. HEATH BAWDEN.

Note on a Quantitative Analysis of Mathematical Intelligence. WILLIAM BROWN.

Reviews and Abstracts of Literature. Journals and New Books. Notes and News.

FOUR IMPORTANT BOOKS BY HUGO DE VRIES THE MUTATION THEORY

(Two Volumes)

*Experiments and Observations on the Origin of Species in the
Vegetable Kingdom*

VOLUME I NOW READY

VOLUME II IN PRESS

Translators: **Professor J. B. FARMER** and **A. D. DARBISHIRE**

VOLUME I

ORIGIN OF SPECIES BY MUTATION

582 pp. 114 illustrations. Six colored plates (lithographs). Bibliography and index. Price, \$4.00 per volume net (18s.).

A knowledge of the laws of mutation must sooner or later lead to the possibility of inducing mutations at will and so of originating perfectly new characters in animals and plants. And just as the process of selection has enabled us to produce improved races, greater in value and in beauty, so a control of the mutative process will, it is hoped, place in our hands the power of originating permanently improved species of animals and plants.

INTRACELLULAR PANGENESIS

(In Press.) 300 pp. Cloth, \$3.00.

An investigation of the physiology of heredity, especially the facts of variation and of atavism. A critical survey of previous theories of heredity from the standpoint of observation of physiological cell-life is followed by a summary of the hypothesis of pangenesis.

The third part of the book consists of a chapter on Fertilization and Hybridization.

The whole science of vital phenomena is contained in what De Vries calls *the Pangen*, a special hereditary character, which may be made the object of experimental treatment in animals as well as in plants. It is a most attractive theory, and the book is so truly scientific in its simple language and reverential spirit as to be easily read and understood by the layman in science as well as the scholar; and the preacher as well as the plant breeder will find in it many fine inspirations.

SPECIES and VARIETIES: Their Origin by Mutation

Second Edition, thoroughly corrected and revised, with portrait. Price, postpaid, \$5.00 (21s.) net. xxiii+830 pages. 8vo, cloth, gilt top.

The contents of this book include a readable and orderly recital of the facts and details which furnish the basis for the mutation-theory of the origin of species. All of the more important phases of heredity and descent come in for a clarifying treatment that renders the volume extremely readable to the amateur as well as to the trained biologist. The more reliable historical data are cited, and the results obtained by Professor de Vries in the Botanical Garden at Amsterdam during twenty years of observations are described.

PLANT BREEDING

Comments on the Experiments of **NILSSON** and **BURBANK**

A scientific book in simple language. Intensely interesting as well as instructive. Of special value to every botanist, horticulturist, and farmer. Pp. xv+360. Illustrated with 114 beautiful half tone plates from nature. Printed on fine paper in large type. Cloth, gilt top. Price, \$1.50 net. Mailed, \$1.70.

**Supplied by your dealer; or direct on receipt of your order with
the mailing price.**
